Vashisth Tiwari

(585) 524-8385 | vashistt@andrew.cmu.edu | www.linkedin.com/in/vashistht/ | https://vashistht.github.io/

Education

Carnegie Mellon University *Pittsburgh, PA*
Master of Science in Artificial Intelligence Engineering (GPA: 4.0) *Aug. 2023—Dec. 2024*
- Courses: Advanced NLP, Deep Learning, Machine Learning, AI Systems, Stochastic Processes, Deep Learning Systems*
- Teaching: Advanced Natural Language Processing (Fall'24) w/ Prof. Graham Neubig

University of Rochester *Rochester, NY*
Bachelor of Science in Physics, Bachelor of Arts in Mathematics (GPA: 3.97) *Aug. 2019—Aug. 2024*
- Awards: Phi Beta Kappa, Semi-Finalist Rhodes Scholarship India, Harry W. Fulbright Prize, Undergrad Teaching Award
- Courses: Modern Statistics & Exploration, Data Structures & Algorithms, Probability, Real Analysis

Research Experience

SLAB Lab@CMU w/ Prof. Emma Strubell *Pittsburgh, PA*
Research Assistant *Aug. 2024—Present*
- Designing and exploring the efficacy of active synthetic data generation for LLMs by incorporating student model feedback

InfiniAI Lab@CMU w/ Prof. Beidi Chen *Pittsburgh, PA*
Research Assistant *Feb. 2024—Aug. 2024*
- Demonstrated that speculative decoding significantly improves both throughput and latency in LLM inference, a key insight for performance optimization. Achieved up to 2x speedup for LLaMA-3 inference with batch sizes of 128 and above
- Investigated integration of diverse model sparsities (weight, attention, activation) in speculative decoding draft models

Dark Energy Spectroscopic Instrument w/ Prof. Segev Benzvi *Rochester, NY*
Research Assistant *Jan. 2020—May 2021*
- Designed multi-class CNNs for spectral data with TensorFlow, scikit-learn to find galaxies with supernovae
- Enhanced network performance by applying noise-removal techniques like binning and filtering to preprocess spectral data
- Achieved 95%+ accuracy and high precision for supernovae classification tasks in the DESI data pipeline

Work Experience

Mana Finance Corporation *Hillsborough, CA*
Quantitative Research Intern *May 2022—Aug. 2022*
- Utilized statistical techniques to analyze stock price distributions and quantify investment risk; developed ML models for assessing expected yields on potential investments
- Prototyped a tool demonstrating direct tracking of Ethereum blockchain data on UniSwap (ingestion, indexing, & visualization)

Los Alamos National Laboratory *Los Alamos, NM*
Research Intern *Jun. 2021—Aug. 2021*
- Modeled complex quantum system using Python; utilized numerical differential equation solvers in Mathematica and Python
- Discovered optimal laser pulse parameters through high-dimensional optimization and parameter estimation using SciPy, CvxPy
- Improved the system performance by 5% beyond the current state-of-the-art pulse parameters

Projects

Pruning while Preserving Reasoning Capabilities *Mar. 2024—May 2024*
- Improved upon Bonsai (forward pass only structured LLM pruning, compatible with consumer hardware) in math-reasoning tasks
- Demonstrated that novel task-aware pruning metric better retains reasoning abilities than the standard perplexity baseline

End-to-End NLP System Building *Feb. 2024—Mar. 2024*
- Engineered a Retrieval Augmented Generation (RAG) based chatbot on CMU utilizing webpages and semantic scholar data
- Implemented core RAG components: LangChain embedder, Faiss+ColBERT retriever, and reader using open-source LLMs

LLaMA-2 from Scratch *Feb. 2024*
- Built a 42M LLaMA-2 model and trained on TinyStories dataset: implemented ROPE embeddings, AdamW optimizer, attention
- Continued pre trained on CFIMDB and fine-tuned on SST-5 datasets to enable zero-shot movie review sentiment analysis

MLBareBones *Aug. 2023—Dec. 2024*
- Implemented ML algorithms from scratch using NumPy: neural networks, SVMs, linear regression, decision trees, AdaBoost, etc.

Skills & Leadership

Languages: Python, Java, C++, Mathematica, Bash
Libraries / Frameworks: PyTorch, Hugging Face, TensorFlow, NumPy, Pandas, Scikit-Learn, Spark, Apache Kafka, Cuda
Leadership: Peer Mentor, Department of ECE (CMU); President, Society of Physics Students (University of Rochester)
